

Freeform

Bespoke Tensile Canopy System

SDSAILS 

Introducing Freeform

The concept of Freeform is a system designed to simplify the process of quoting and manufacturing bespoke tensile canopies and shade sails. With a set of five simple parameters that the canopy must fall in to, Freeform allows the flexibility to cover the vast majority of small to medium scale projects with ease.

Available in 6 different shade and waterproof fabric styles from the best suppliers worldwide, there are 100 different designer colours to choose from to suit every canopy application.

Formulated to work exclusively with industry professionals, Freeform requires only basic measurements in order to provide a beautifully engineered canopy, guaranteed to fit perfectly every time.

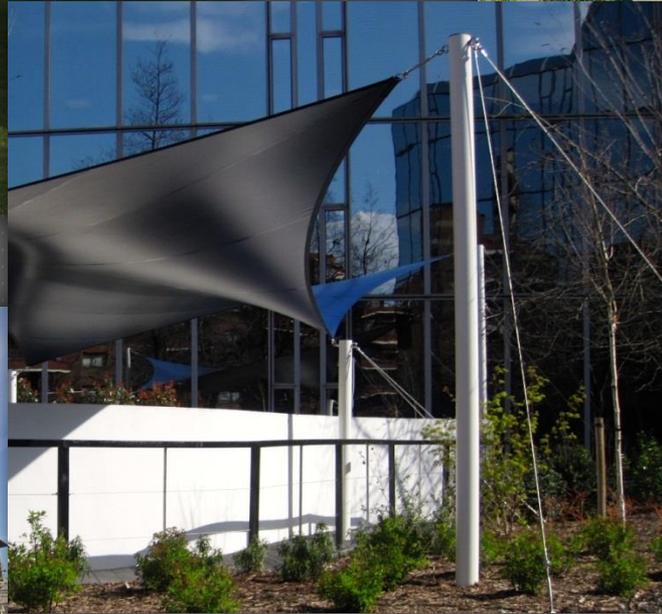

Manufactured to the highest quality in the United Kingdom and built for the most demanding commercial environments, every Freeform canopy is computer designed and cut to fit your exact requirements.

Become a trade partner to access our online quote system and document library, and benefit from our extensive phone support knowledge.
